EDUCATION

Politecnico di Milano | MSc Digital and Interaction Design
Sep 2026 - Jul 2028 (expected)
Digital Experience Design · Interaction Design · Human-Computer Interaction · Service Innovation · Emerging Technologies

University of the Arts London | MSc Computing and Creative Industry
Oct 2022 - Dec 2023 · Distinction
Creative Computing · Machine Intelligence · Physical Computing · Computational Creativity · Interactive Media · Computational Environments

University of Manchester | BA (Hons) Architecture
Sep 2019 - Jun 2022 · 2:1 Honours
Spatial Design · Environmental Design · Systems Thinking · Digital Fabrication

Google UX Design Professional Certificate | 2024

PROFESSIONAL EXPERIENCE

EY wavespace | Strategic Experience Designer / AI Innovation Consultant
Shanghai, China | Dec 2024 - Aug 2026

• Independently designed and developed Avatar Creator, a web-based experience combining touchscreen personalisation, participant signatures and live group displays; deployed in multiple client workshops.

• Co-developed AI Worldcafe, a signature experience connecting text, image, video and spatial AI with business scenarios, hands-on technology exploration and participant co-creation.

• Presented and facilitated the spatial-intelligence station, translating emerging technologies into accessible demonstrations and guiding exploration of applications across sectors.

• Designed Visual Odyssey narrative canvases to communicate workshop milestones and future directions, combining AI-assisted asset exploration with visual design refinement.

• Designed 50+ workshop frameworks, translating complex enterprise challenges into structured agendas, co-creation exercises and visual narratives for collaborative problem-solving.

• Collaborated with clients across consumer businesses, technology, life sciences and real estate, including finance teams; adapted experiences to participant needs and designed a LEGO-based exercise exploring AI and task allocation.

Nanjing LES Cybersecurity and IT Research Institute | Product Manager
Nanjing, China | Mar 2024 - Nov 2024

• Conducted user and competitive research; translated findings into user flows, interaction prototypes and functional specifications.

• Worked with development and testing teams on usability analysis, design refinement and product iteration.

DESIGN & TECHNICAL CAPABILITIES

Research & UX: User research, competitive analysis, user flows, Double Diamond; Figma components, auto-layout, variants, responsive UI and prototyping.

Interactive prototyping: JavaScript, Python, Unity/C# and Arduino; physical-digital interaction and sensor input.

Spatial design & making: Blender, Rhino, Cinema 4D, SketchUp; 3D modelling and 3D-printed prototypes.

Co-creation & storytelling: Workshop design and facilitation, stakeholder collaboration, Miro, Adobe Creative Suite and AI-assisted visual exploration.
