EDUCATION

MSc Digital and Interaction Design*, *Politecnico di Milano*, *Milan, Italy **Sep 2026 - Current**

MSc Computing and Creative Industry*, *University of the Arts London*, *London, UK **Oct 2022 - Feb 2024**
Grade: Distinction

BA (Hons) Architecture*, *The University of Manchester*, *Manchester, UK **Sep 2019 - Jun 2022**
Grade: 2:1 Honours

WORK EXPERIENCE

Ernst & Young - EY wavespace, Shanghai, China — Dec 2024 - Aug 2026

Strategic Experience Designer & AI Innovation Consultant

Designed interactive experiences and AI demonstrations for enterprise stakeholders, helping cross-functional teams explore business challenges, assess potential AI applications, and discuss strategic priorities.

- Designed **50+ strategy co-creation frameworks** and co-hosted **20+ executive sessions**, recording **800+ participant attendances** across functions and seniority levels, including global C-suite leaders. Structured complex business challenges into focused discussions and collaborative exercises, helping teams build a shared understanding of priorities and inform strategic roadmaps.
- Guided stakeholders in **identifying AI use cases** relevant to their workflows and business priorities, and co-developed hands-on demonstrations that made technical capabilities tangible. Helped teams assess potential applications and identify opportunities for further exploration.
- Developed **interactive digital and physical tools and AI-assisted visual narratives** for executive events, enabling participants to contribute ideas, exchange perspectives, and see discussions captured on shared digital canvases. Provided teams with a clear visual reference for **strategic priorities and future direction**.

Nanjing LES Cybersecurity and IT Research Institute, Nanjing, China — Mar 2024 - Nov 2024

Product Manager

Managed requirements and interaction design for a SaaS platform, working with cross-functional teams and stakeholders across the product ecosystem to translate user and business needs into clear specifications and guide product improvements.

- Conducted user and competitive research to identify workflow issues and unmet needs, providing evidence for feature planning and design decisions.
- Created user flows, interaction prototypes, and functional specifications, giving developers a clear understanding of how features should work and fit into the user journey.
- Worked with developers and testers to clarify requirements, review usability issues, and refine interactions, helping keep implementation consistent with user needs and intended product behaviour.

RESEARCH PAPER

Window of the Mind – Affective Computing & Generative Interaction of Emotional States **Dec 2023**

Developed an interactive system in Python that translates biometric signals into AI-generated visuals, exploring how creative technology can support self-expression, emotional reflection, and interpersonal communication.
Link: http://dx.doi.org/10.13140/RG.2.2.21113.24165

The Relationship Between Computational Art and Traditional Art **Dec 2022**

Investigated how computational thinking fosters novice creativity, positioning technology as an inclusive design tool.
Link: http://dx.doi.org/10.13140/RG.2.2.12724.63362

SKILLS

Skills: User Experience Design; User Research; Interaction Design; AI Adoption & Use-case Exploration; Stakeholder Communication; Strategy Co-creation; Interactive Prototyping; Innovative Experience Design.
Tools: Figma; Miro; Adobe Creative Suite; MS Office Suite; Python; C++; Arduino; Unity; Blender; Cinema 4D; SketchUp.
Languages: Chinese (Native); English (C2); Italian (B2).
