

YILIN GU

Designing human-centred experiences where AI, emerging technologies, and strategic innovation meet.

Shanghai, China / Milan, Italy | ✉ gyilin1115@gmail.com | issuu.com/guyilin

PROFILE

Strategic Experience Designer with an interdisciplinary background in architecture, computing, and innovation consulting. Experienced in designing AI-powered experiences, strategic workshops, and interactive solutions that connect emerging technologies with human needs and business transformation.

Combining design thinking, spatial intelligence, generative AI, and storytelling, I translate complex challenges into immersive experiences, digital prototypes, and future-oriented strategies. With experience at EY wavespace and an MSc background in digital experience design, I specialise in exploring how AI and emerging technologies can reshape the way people interact, collaborate, and experience digital environments.

Currently MSc Digital and Interaction Design student at Politecnico di Milano, focusing on human-centred interaction, digital experiences, and emerging technologies.

EDUCATION

MSc Digital and Interaction Design

Sep 2026 – Present

Politecnico di Milano Milan, Italy

Focus areas: Digital Experience Design · Interaction Design · Human-Computer Interaction · Service Innovation · Emerging Technologies

MSc Computing and Creative Industry | *Distinction*

Oct 2022 – Dec 2023

University of the Arts London (UAL) London, UK

Relevant areas: Creative Computing · Machine Intelligence · Physical Computing · Computational Creativity · Interactive Media · Computational Environments

BA (Hons) Architecture | *2:1 Honours*

Sep 2019 – Jun 2022

The University of Manchester Manchester, UK

Relevant areas: Spatial Design · Environmental Design · Systems Thinking · Digital Fabrication

Google UX Design Professional Certificate

Nov 2023 – Jun 2024

PROFESSIONAL EXPERIENCE

Strategic Experience Designer | AI Innovation Consultant

Dec 2024 – Aug 2026

EY wavespace Shanghai, China

- Designed and facilitated **50+ innovation workshops** for enterprise clients, applying design thinking, co-creation methods, and strategic design approaches to explore digital transformation and AI opportunities.
- Developed AI-powered experiences and interactive prototypes by integrating generative AI, spatial computing, and emerging technologies into client-facing innovation scenarios.
- Translated complex business challenges into human-centred experiences through UX design, interaction design, prototyping, and strategic storytelling.
- Designed immersive storytelling frameworks and visual communication systems to transform strategic insights into engaging experiences for executive audiences.
- Researched and experimented with emerging AI technologies, including generative models and open-source creative workflows, exploring their potential applications in business and experience design.
- Collaborated with multidisciplinary teams and clients across real estate, F&B, biotechnology, technology, and fashion industries to deliver innovation strategies and proof-of-concept solutions.

Nanjing LES Cybersecurity and IT Research Institute Nanjing, China

- Conducted user research, requirement analysis, and competitive research to identify user needs and improve digital product experiences.
- Designed user flows, interaction prototypes, and functional specifications through collaboration with product managers, developers, and testing teams.
- Supported product iteration through usability analysis, design refinement, and cross-functional communication.

2D & 3D Branding Design Intern

Jun 2023 – Aug 2023

Nanjing Congtoo Information Technology Co., Ltd. Nanjing, China

- Developed visual identity systems, motion graphics, and digital communication materials to support brand strategy.
- Created 3D visualisation models using point cloud data for engineering and technical communication projects.

SELECTED PROJECTS

Strategic Workshop Frameworks

2024 – 2026

Experience Design & Innovation Consulting | EY wavespace

- Designed modular workshop frameworks combining strategic design methods, storytelling, and collaborative facilitation.
- Created immersive environments that enabled enterprise teams to explore emerging technologies, align strategic visions, and co-create future solutions.

4D AI Worldcafe: Spatial Intelligence

2024 – 2026

AI Strategy Workshop & Future Experience Research

- Explored the evolution of AI interaction from screen-based assistants toward spatial intelligence and human-AI collaboration.
- Designed workshop experiences allowing participants to experiment with generative AI workflows and envision future spatial computing scenarios.

Web-based Interactive Avatar Creator

2026

Creative Technology Prototype

- Developed an interactive avatar generation experience integrating web interaction, AI-generated imagery, and large-scale digital displays.
- Created a participatory experience where users contribute digital identities into collective visual environments.

Window of the Mind

2023

Generative Visualization of Emotional States | MSc Thesis

- Explored the relationship between physiological signals and emotional expression through AI-generated visualisation.
- Integrated biosignal sensing, Arduino, Python data processing, and image-to-image translation models to transform emotional states into visual narratives.

SKILLS

Strategic & Experience Design: Service Design, Experience Design, Interaction Design, User Experience Design, Design Thinking, Workshop Facilitation, Co-creation Methods, Strategic Storytelling, Systems Thinking

AI & Emerging Technologies: Generative AI, AI Experience Design, Spatial Intelligence, Spatial Computing, Creative Coding, Interactive Prototyping, Human-Computer Interaction, Physical Computing

Design & Development Tools: Figma, Adobe Creative Suite, Python, JavaScript, C++, Arduino, TouchDesigner, Blender, Cinema 4D, 3ds Max, Unity, Unreal Engine

LANGUAGES

Chinese — Native English — Professional Working Proficiency Italian — B1
